Hidden Treasure Mine (M/001/0067) - update & knapweed control2 messages

Peter Brinton <peterbrinton@utah.gov>

Fri, Jul 18, 2014 at 12:35 PM

To: Leslie Buhler <lbuhler@csmining.com>

Hi Leslie,

It's been a while since you joined CS Mining, and I haven't really introduced myself, given the large mine permitting process with which Bob's obviously been mostly involved. If I understand right, Ron Wunderlich is increasingly less involved now that he's "retired", and you are taking his place. Hopefully things are going well.

When you get a minute, will you give me a call? Thanks. I have a few specific things to discuss - an inspection and the knapweed on private land near the regraded Mary I pit (first noticed last summer). The knapweed is the bigger immediate priority for me to discuss, as the plants this year should be big enough to clearly identify now, and hopefully could be sprayed or otherwise controlled. I'm not a biologist, but can get info from our biologists and discuss options for controlling it. Maybe Ed Ginouves has already discussed this to some degree.

Peter
